EDUCATION

Toronto Metropolitan University
Honours of Computer Science (Dean's List)

Fall 2019 - Winter 2024

Relevant Courses Taken: Comm in the Computer Industry(CMN300), Artificial Intelligence(CPS721), Algorithms(CPS616), Autonomous Mobile Robotics(CPS607), Applied Cryptography(CPS713), Software Tools for Startups(CPS847)

PROJECT MANAGEMENT EXPERIENCE - NAMAVAR INDUSTRIES INC.

Supply Chain Transformation Project, Sunnybrook Hospital

May 2023- December 2024

- Given 12 patient care units at the hospital which through extensive data analysis, communication and on-site analysis saw their Supply Rooms transformed
- Connected with nurses, patient care managers, directors and third party companies to ensure the project was coming along smoothly
- Performed extensive data analysis with the purchase history of the unit pulled from SAP, alongside cross examining their current cart profile to point out changes which need to be implemented
- The finite space fully optimized, allowing for 20% more space for supplies, more efficient flow runs and a 19% reduction in products used overall saving the hospital nearly \$300,000 in the first year

Warehouse Transformation Project, First International Courier

May 2024

- Given two 5,000 square foot warehouses, designed a floor plan and organized a team to install three different types of storage, organized for optimized pathing while following safety protocols
- The receiving and shipping bays previously together, were separated in to a warehouse each, organized and mapped using 3D software. Deployed, the project cleared 35% more space which was previously not available
- The new layout combined with the unique setup of storage optimized for fast exports, cutting the time it previously took to get items out by 1/3
- Since as a emergency healthcare shipping company warehouses cannot be closed during deployment, the project originally estimated to take 5 full days was finished and delivered professionally in just under 3 days

SOFTWARE DEVELOPMENT EXPERIENCE

Co-Founder and Founding Developer, Aether Web Design

April 2024- present

- **Navid Best Group Inc**
Building a modern and aesthetically pleasing website for a home remodelling business. Gallery pages, advanced filters and interactive 3D models being implemented throughout the website. The owner anticipates to be adding a full customizable 3D kitchen model in the upcoming year. Built with React, Typescript, Next.js, TailwindCSS, Framer Motion, Three.js, Sanity.
- **Bayview Glen Dental**
A simplistic personalized website was delivered to the Bayview Glen team. Organized professional

photography of all staff, and ensure on time delivery. In the first 2 months of deployment the website secured triple the amount of bookings as the previous year

- **Doer**

Doer, a company with an application where anyone can make money by providing home services reached out regarding our services. We connected with the team and a landing page was designed and delivered to display their application and go over its services. This landing page features an AI Chatbot which has been trained to take inquiries and solve simple IT issues

TEAM MANAGEMENT AND MARKET RESEARCH

Account Manager, World AI Group

Feb 2023- August 2023

- Attended events to promote the brand, connect with existing clients and scout potential candidates for the team
- Successful in booking 20 meetings with new prospects in the span of 2 months
- Performed market research for a new AI powered platform which allows dentists to view all the statistics of their practice. Currently this platform is known as DentiCE and is being used as a tool for lead generation and practice optimization
- Managed communications between the development and marketing sectors of the company to ensure the client's needs were being met
- Hosted day to day meetings regarding task distribution with the team in absence of the CEO

HEALTHCARE

Supply Chain Services, Sunnybrook Hospital

Sept 2022- June 2023

- Maintained stock levels, rotated inventory, and handled discrepancies with Mohawk Medbuy and SB Logistics.
- Through day to day interactions in the Operation Rooms and Cathlabs got familiar with different types of products, their functions and their suppliers. Utilized this information to ensure proper handling and distribution of supplies
- Utilized SAP to efficiently manage supply orders, verify pricing, and access critical data, ensuring seamless coordination with units.
